

WARNING: Before installing this product, read and follow all warning notices and instructions accompanying this pump. Failure to follow safety warnings and instructions can result in severe injury, death, or property damage.

- Common refers to a wire that remains energized, while the other wires are switched.
- Terminals L1 & A should NEVER be energized at the same time.
- A Single Pole Double Throw Switch (SPDT) is shown. There are many options for controlling EcoPump. Options include a mechanical time clock or programmable pool controllers. A Double Pole Double Throw (DPDT) switch may be used to control multiple devices from the same switch (ultraviolet system, salt system, etc.)
